

Stay in Control of Your Deliveries

Plan and manage the entire QA and delivery process with full visibility and control.

Q360 Delivery Plan (DLP) helps teams plan, track, and perform QA on project project deliveries in a structured and transparent way. It ensures deadlines are met, standards are upheld, and stakeholders stay aligned throughout the project lifecycle.

Built for managing complex project deliveries with full traceability and control.

The Problem

- Limited control and transparency of incoming documentation
- Delivery requirements are often unclear or scattered across tools
- Deadlines slip due to lack of coordination and visibility
- Manual follow-up and status tracking consume significant time
- Lack of structured QA increases the risk of errors
- Limited traceability and audit trail for deliveries

The Solution

Q360 Delivery Plan (DLP) provides a structured framework to define, manage, and track deliveries across projects.

- Centralized overview of all planned and received deliveries
- Clear ownership, defined deadlines, and responsibilities
- Real-time status tracking and progress visibility
- Built-in QA processes integrated in the delivery workflow
- Seamless integration with daily tools (e.g. Microsoft Teams)
- Standardized execution of delivery processes across projects

Key Benefits

Full delivery control

Know exactly what is due, when, and by whom

Less manual work

Reduce time spent on coordination and follow-up

Higher quality deliveries

Ensure complete, correct and QA-verified outputs

End-to-end transparency

Shared visibility across teams and stakeholders

Increased efficiency

Spend less time managing deliveries, more time producing value
